

EDUCATION	Washington University in St Louis <i>Ph.D. in Computer Science</i> • Advisor: Prof. Yevgeny Vorobeychik	St. Louis, MO 2023 - 2028 (<i>expected</i>)
	Imperial College London <i>MSc. Pure Mathematics (Distinction)</i> • Advisor: Prof. Paolo Cascini	London, England 2022 - 2023
	University of Edinburgh <i>BSc. (Hons) Artificial Intelligence and Mathematics (First Class)</i>	Edinburgh, Scotland 2018 - 2022
PUBLICATIONS AND PREPRINTS	<ol style="list-style-type: none"> 1. Luise Ge, Michael Lanier, Anindya Sarkar, Bengisu Guresti, Yevgeniy Vorobeychik, Chongjie Zhang, “Learning Policy Committees for Effective Personalization in MDPs with Diverse Tasks,” <i>the 42nd International Conference on Machine Learning (ICML)</i>, 2025 2. (α-β) Luise Ge, Brendan Juba, Kris Nilsson, “Polynomial-Time Relational Probabilistic Inference in Open Universes”, <i>the 34th International Joint Conference on Artificial Intelligence (IJCAI)</i>, 2025 3. (α-β) Luise Ge, Daniel Halpern, Evi Micha, Ariel D. Procaccia, Itai Shapira, Yevgeniy Vorobeychik, Junlin Wu, “Axioms for AI Alignment from Human Feedback”, <i>the 38th Annual Conference on Neural Information Processing Systems (NeurIPS)</i>, 2024 (<i>Spotlight, 2.1% of submissions</i>). 4. Luise Ge, Brendan Juba and Yevgeniy Vorobeychik, “Learning Linear Utility Functions From Pairwise Comparison Queries” <i>the 23rd International Conference on Autonomous Agents and Multiagent Systems (AAMAS) SCA LA Workshop</i>, one-page abstract accepted by the 8th International Conference on Algorithmic Decision Theory (ADT), 2024 	
AWARDS AND HONORS	<ul style="list-style-type: none"> • Cox Fellowship, Washington University in St. Louis • Best Final Year Performance by Woman Student, School of Informatics, University of Edinburgh • Outstanding Honours Project, School of Informatics, University of Edinburgh 	2023 2022 2022

RESEARCH EXPERIENCE	Edinburgh University Laboratory for Foundations of Computer Science 2022 <ul style="list-style-type: none"> • Fair Allocation of Chores, Undergraduate Thesis • Implemented and optimized a multi-stage algorithm to compute the competitive equilibria of chore allocation, tackling challenges in computational complexity, incentive compatibility, and privacy preservation. This work demonstrates expertise in designing scalable algorithms and analyzing user behavior under complex constraints, applicable to recommender systems and ranking models.
	Edinburgh University Laboratory for Foundations of Computer Science 2022 <ul style="list-style-type: none"> • Investigating the structures of small compact categories for category-based cryptography, Summer Intern • Explored category theory to design a novel public key encryption protocol, leveraging the universal properties of mathematical structures. Developed algorithms in GAP to analyze category properties, demonstrating strong problem-solving and computational skills that can be applied to ensuring data integrity and privacy in graph-based ML models.
	Edinburgh University Laboratory for Foundations of Computer Science 2021 <ul style="list-style-type: none"> • Probabilistic modeling for advanced health care, Summer Intern • Developed probabilistic models using real-world sensor data to simulate daily activities and interactions, showcasing skills in Markov analysis, stochastic modeling, and graph-based representations. These techniques align closely with data-driven modeling and graph analysis used in user modeling and personalization tasks.
	Oxford University Mathematics Department 2020 <ul style="list-style-type: none"> • Analyzing the dynamics of deep neural networks with chaos theory, Summer Intern • Investigated the stability and dynamics of deep neural networks through Lyapunov spectrum analysis, using TensorFlow for automatic differentiation. This research provided insights into the robustness and optimization of neural architectures, directly applicable to enhancing recommender systems and ranking algorithms.
TEACHING	Demonstrator: <i>Cognitive Science</i> , 2021, 2022, University of Edinburgh Tutor: <i>Introduction to Algorithms and Data Structures</i> , 2021, University of Edinburgh <i>Introduction to Computation and Logic</i> , 2020, University of Edinburgh
ACADEMIC SERVICES	Conference Reviewer: <i>International Conference on Learning Representations (ICLR '25)</i> Journal Reviewer: <i>Journal for Artificial Intelligence Research (JAIR '25)</i>
LEADERSHIP AND OUTREACH	Graduate Ambassador: Washington University in St Louis 2024- Maths Student Representative: Imperial College London 2023 Edinburgh Award (Volunteering 50h+) 2020 Edinburgh Award (Change Agents) 2019
